

## MB112

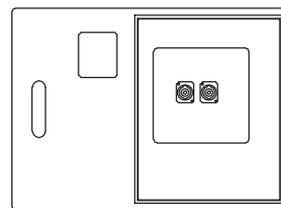

The MB112 is one of Funktion-One's most compact bass enclosures. It makes a great bass extension to the F55 and F81 loudspeakers in applications such as bars, restaurants and home studios. It comprises a single 12" loudspeaker driving a ported resonant chamber enclosure handling 250 Watts and averaging an impressive 105dB sensitivity between 60Hz and 160Hz. There is also a self powered version available which elegantly solves the issue of a mono-sum, crossover and amplification set up.

| Driver                   | Sensitivity<br>(1W at 1m)   | Power<br>(rms*) | Nominal<br>Impedance |
|--------------------------|-----------------------------|-----------------|----------------------|
| 12"<br><i>*AES rated</i> | 104dB                       | 250W            | 8Ω                   |
| Frequency Response ±3dB: | 60Hz - 160kHz               |                 |                      |
| Weight (unpowered):      | 19.5kg (43lbs)              |                 |                      |
| (powered):               | 20.5kg (45lbs)              |                 |                      |
| Construction:            | 15mm Birch Ply              |                 |                      |
| Connectors               | 2 x Speakon NL4             |                 |                      |
| (unpowered):             | XLR Left & Right (mono sum) |                 |                      |
| (powered):               |                             |                 |                      |
