

RESOLUTION 4S

The Resolution 4S is a three-way mid-high skeletal loudspeaker, specifically designed to be cost effective by dispensing with the touring features (enclosure and flying equipment) in fixed installation applications. It offers uniform and controlled dispersion with sound quality equal to that of the enclosed versions. The Resolution 4S is suited to a wide range of applications including demanding club and theatre venues. Also available with a passive high frequency crossover, the R4S can be bi-amplified to minimise overall system cost. The mid-high horn section can be supplied rotated through 90° to facilitate horizontal use where ceiling height is restricted.

Features:

- Lightweight minimalist design
- Supplied in vertical or horizontal formats
- Funktion One designed drivers
- Suspension points provided
- Optional lightweight Neodymium magnets
- Optional passive HF crossover
